

**REMARKS:**

Claims 1-5, 8-19, and 22-28 are currently pending in the application. The Applicants are submitting herewith a proposed Examiner's Amendment, in response to a telephone call from Examiner Sunray Chang on 17 February 2006.

In response, the Applicants are submitting herewith a proposed Examiner's Amendment, amending independent claims 1, 11, 12, 15, and 25-28, in an effort to expedite prosecution of this Application and to more particularly point out and distinctly claim the subject matter which the Applicants regard as the invention. In addition, the Applicants have canceled independent claims 13 and 14 without prejudice. By making these amendments, the Applicants make no admission concerning the merits of the Examiner's previous rejections, and respectfully denies any statement or averment of the Examiner not specifically addressed. Particularly, the Applicants reserve the right to file additional claims in this Application or through a continuation patent application of substantially the same scope of originally filed claims 1-28. No new matter has been added.

The Applicants respectfully submit that amended independent claims 1, 11, 12, 15, and 25-28 are considered patentably distinguishable over *Glass*. With respect to dependent claims 2-5, 8-10, 16-19, and 22-24: claims 2-5 and 8-10 depend from amended independent claim 1 and claims 16-19 and 22-24 depend from amended independent claim 15. Thus, dependent claims 2-5, 8-10, 16-19, and 22-24 are considered patentably distinguishable over *Glass*, for at least the reasons of depending from an allowable claim and are therefore considered to be in condition for allowance.

In addition, the Applicants respectfully request that the Examiner call the undersigned at (817) 447-9955, if the Examiner has additional comments or suggestions on the amendments to independent claims 1, 11, 12, 15, and 25-28 of the subject Application or if the Examiner believes it would be easier to discuss the amendments to independent claims 1, 11, 12, 15, and 25-28 over the telephone.
